

## Notice Sheet 10

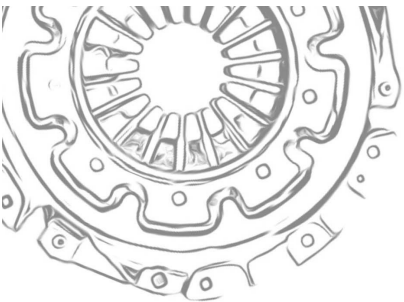

**Please leave  
in customer's  
vehicle**

### Important Notice

Now you have your brand-new NPC clutch fitted you will need to give it a chance to bed in before putting it through any hard use.

1000km's of regular day to day driving is recommended. It's the engagement of the clutch that does the bedding in, so ideally lots of gear changes and around town driving.

Burnouts, flat changes, and general hard use is not recommended until the clutch has had a chance to bed in.
